Re: Talostone Stone Solutions & Passover

To Whom It May Concern,

Kosher Australia has reviewed the materials used and the construction of the following stone surfaces manufactured by Talostone of 97 Jemma Road, Prestons NSW 2170.

1. MinQ® Zero - Mineral Surfaces
2. Artsense® - Sintered Stone
3. Natroccia® - Natural Stone

In order to kosherise (kosher sterilise) these surfaces for Passover, an acceptable method, is the use of a portable steam generator that raises the water and steam generated to 100 degrees Celsius or higher.

The boiling water and the accompanying steam created and sprayed out by this apparatus is considered sufficient to be considered identical to the more conventional method of boiling water being poured out and heated back to boiling point on the surfaces being kosherised.

The hot pressurised steam acts in the same manner as the heated stone or metal in this regard.

Subsequent to the steam kosherisation, MinQ Zero and Artsense require covering for the duration of Passover.

Should you require further information, feel free contact the Kosher Australia office at info@kosher.org.au or 03 8317 1500.

Please note that this is not a formal kosher certification.

Regards,

Yankel Wajsbort
General Manager
