

# FLOORING WITH **MINQ<sup>®</sup>zero** Mineral Surfaces

Elevate your design with an added layer of luxury and prestige by incorporating Talostone<sup>®</sup> MinQ<sup>®</sup> Zero into your flooring.

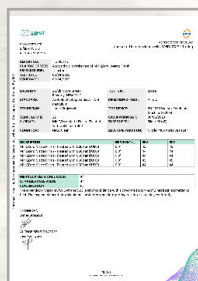

Depending on the specific slip rating requirements for your space, selected colours and finishes are suitable in their original state and with a simple treatment process or coating, any colour and finish within the collection can be adapted to meet a wide range of residential and commercial flooring applications.

If you're considering Talostone<sup>®</sup> MinQ<sup>®</sup> Zero for flooring, we recommend considering either a Matte or Leather Honed finish. As demonstrated in the **NATA Certifications** for Matte and Leather Honed finishes, all MinQ<sup>®</sup> Zero colours in these finishes will achieve a P3 slip rating following a quick and cost-effective treatment - ideal for most indoor flooring environments. Should you prefer to use one of the colours in a polished finish, a clear coating may be the most suitable solution.

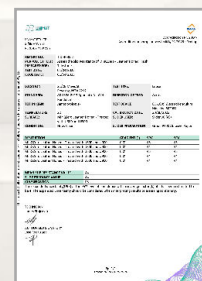

To review slip ratings before and after treatment for each individual colour, as well as general slip rating requirements, please refer to the **Unimat MinQ<sup>®</sup> Zero Slip Testing Report Summary**.

**Unimat Report**

**Nata Certificate  
Matte Finish**

**Nata Certificate  
Leather Honed Finish**

With the support of a trusted partner like Unimat, you can confidently extend the beauty of Talostone<sup>®</sup> MinQ<sup>®</sup> Zero to floors and stairs - without compromising on safety. Once you've selected your ideal MinQ<sup>®</sup> Zero, simply use the link below to connect with Unimat for expert advice on the best options for your project and a tailored quote.

## DISCLAIMER

Pending specific situational treatment requirements, Talostone<sup>®</sup> MinQ<sup>®</sup> Zero surface colouring may vary after treatment. Anyone wishing to carry out slip treatments to Talostone<sup>®</sup> products, do so at their own risk.
