

SINGLE BURNERS HOBS

Single burner hobs offer a sophisticated alternative to the traditional cooktop, allowing individual cooking zones to be integrated into the bench top for greater freedom and flexibility.

Single burner gas hobs are fully approved, compatible and optimised for seamless integration across all three signature Talostone® collections, allowing the beauty of your Natroccia®, MinQ Zero® or Artsense® surface to remain the hero of the kitchen.

Rather than a single, conventional cooktop, individual burners are installed separately within the bench top and can be positioned to complement the proportions, layout and functionality of the space. Depending on the appliance manufacturer, single burner hobs are available in gas or induction configurations and may be flush-mounted or raised, providing greater flexibility to suit individual design and cooking preferences.

With each burner operating independently, the result is a highly functional and considered cooking environment with a streamlined, minimal architectural aesthetic.

DISCLAIMER

All Talostone® products are extremely resilient against heat but is not infallible. Any stone damage caused by heat is not covered by any Talostone® 15 year Limited Warranty and customers choosing to implement single burner hobs, do so at their own risk. Please reach out to Head Office for further clarification via email to info@talostone.com.au or by phone on 02 8783 0600.
